INCLUDE 2 COMPLETE SETS OF PLANS WITH APPLICATION

Permit # GP-_____

NOTE, not grading permit shall be required for agricultural, horticultural, and forestry activities; the construction of a driveway which does not at any point vary from the surrounding grade by more than one foot; the normal graveling or grading of a road or driveway; any project that does not involve, in any one year, an area exceeding 2,000 square feet or more than 1,000 cubic yards of material; construction or maintenance of a septic tank or associated drain field; and activities for which a permit has been issued pursuant to the provisions of the Soil Erosion and Sedimentation Control Act, being part of 91 PA 451 of 1994 as amended

1. Description of all earth changes, construction, and material to be extracted: (attach additional sheets as necessary)

2. Date of Completion: _____

3. Size of total earth change (square feet or acreage): _____

4. Amount of material to be extracted (in cubic yards): _____

Proposed project dates:

1. Installation of temporary erosion controls: _____

2. Excavation/ construction: _____

3. Backfill and rough grade: _____

4. Final grade/ site stabilization: _____

Operating Plan:

1. Hours of operation: _____

2. Proposed traffic to site: _____

R323.1703 Soil erosion and sediment control plan requirements.

Rule 1703. A person shall prepare a soil erosion and sedimentation control plan for any earth change identified in R 323,1704. A person shall design the plan to effectively reduce accelerated soil erosion and sedimentation or both. The plan shall include, but not be limited to, all of the following:

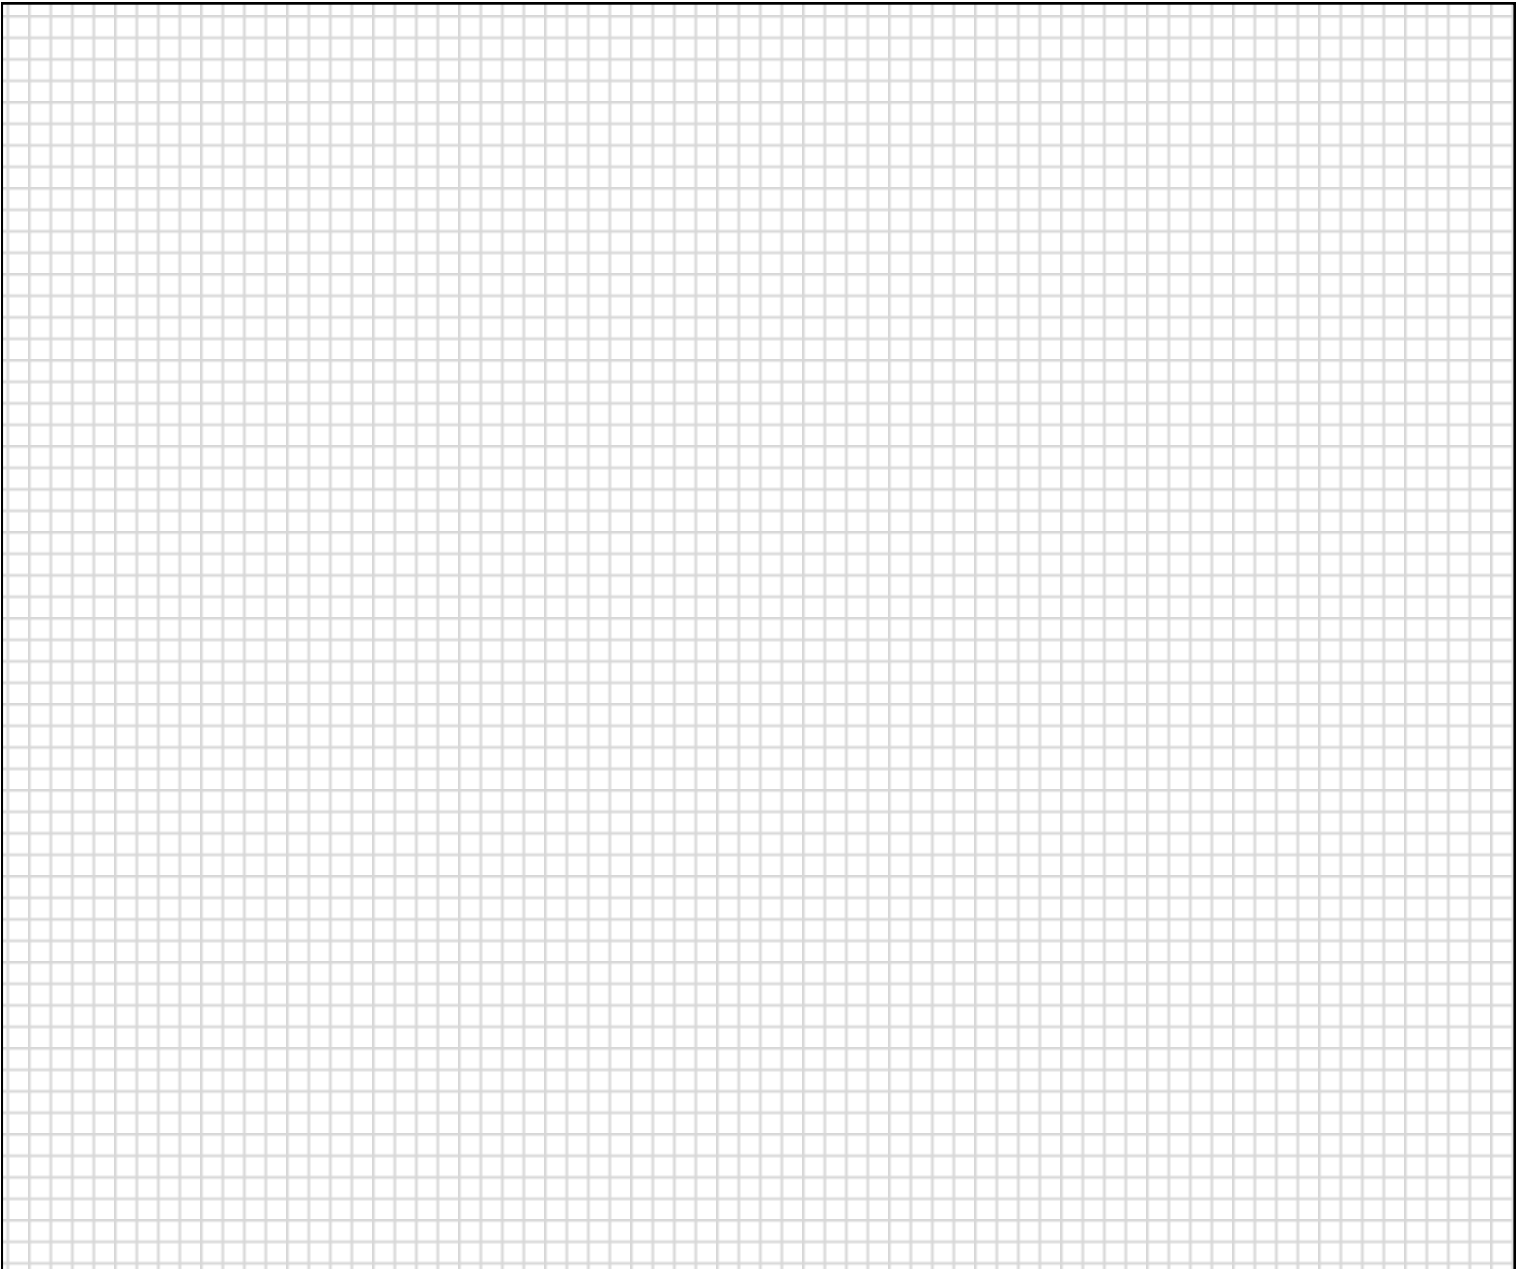

- a) A map or maps at a scale of not more than 200 feet to the inch or as otherwise determined by the county or local enforcing agency. A map shall include a legal description and site location that includes the proximity or any proposed earth change to lakes or streams, or both: predominant land features; and contour intervals or slope description.
- b) A soils survey or written description of the soil types of the exposed land area contemplated for the earth changes
- c) Details for proposed earth changes including all of the following:
 - 1. A description and the location of the physical limits of each proposed earth change.
 - 2. A description and the location of all existing and proposed on-site drainage and dewatering facilities.
 - 3. The timing and sequence of each proposed earth change.
 - 4. A description and the location of all proposed temporary soil erosion control measures.
 - 5. The location and description for installing and removing all proposed permanent soil erosion and sediment measures.
 - 6. A program proposal for the continued maintenance of all permanent soil erosion and sediment control measures that remain after project completion, including the designation of the person responsible for the maintenance. Maintenance responsibilities shall become a part of any sales or exchange agreement for the land on which the permanent soil erosion control measures are located.

History: 1954 ACS 81, Eff. Jan 1, 1975; 1979 AC; 1998 MR7, Eff. July 15, 1998

SITE PLAN which CLEARLY ILLUSTRATES

Permit # GP-_____

1. Topographic map with outline of area to be disturbed
2. Site drawing with approximate finished elevations
3. Location/ description of proposed temporary erosion control and grade stabilization measures (such as silt fencing, berms, mulch, planting, bank protection, structures, trenches, sediment traps, etc.), and an estimate of the length of time that any area will be exposed to erosion.
4. Location/ description of permanent erosion control and grade stabilization measures that will be used to store disturbed areas (such as sod, seed, mulch, gravel, pavement, etc.)
